Professional Summary

Data-driven analyst equipped with advanced skills in SQL, Excel, Tableau, and Power BI, delivering impactful business insights through data visualization and comprehensive reporting. Proven ability to extract, clean, transform, and analyze large datasets to identify trends, anomalies, and opportunities. Expertise in designing and developing dynamic dashboards with KPI measurement for enhanced decision-making. Demonstrated proficiency in uncovering potential fraud, detecting anomalies, and producing actionable intelligence. A track record of transforming raw data into compelling narratives that drive strategic initiatives. Certified in Data Analysis, SQL, and Excel, and trained in data analytics through a virtual internship with Deloitte, applying forensic technology and financial analysis to simulated fraud scenarios. Adept at leveraging SQL for complex data manipulation, Excel for insightful reporting, and Tableau for interactive dashboard development, as demonstrated by projects involving retail sales analysis, marketing campaign performance, and sales performance monitoring. Possesses exceptional critical thinking, communication, and teamwork skills.

Experience

Data Analytics & Forensic Technology Virtual Intern

Deloitte (via Forage) | April 2025 – July 2025

- Simulated fraud detection using forensic technology and financial analysis
- Cleaned and analyzed datasets to identify anomalies and outliers
- Produced insights with visual summaries and decision-support documentation

Projects

Retail Sales Report (SQL)

Analyzed monthly and regional sales using SQL queries

- Analyzed monthly and regional sales using SQL queries
- Used JOIN, GROUP BY, and filters to identify top-performing categories
- Delivered summary reports for business strategy

Marketing Campaign Dashboard (Excel)

Built a dynamic Excel dashboard using PivotTables, slicers, and formulas

- Built a dynamic Excel dashboard using PivotTables, slicers, and formulas
- Evaluated campaign performance across different channels and regions
- Automated monthly reporting with Excel tools

Sales Performance Dashboard (Tableau)

Developed an interactive Tableau dashboard for sales and profit metrics

- Developed an interactive Tableau dashboard for sales and profit metrics
- Enabled deep dives using filters by region, category, and segment
- Presented clear KPIs for C-level decision-making
